## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of Group I, claims 1-22 and 37-39, in Paper No. 6 is acknowledged.
2. Claims 23-36 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.

### *Information Disclosure Statement*

3. The information disclosure statement (IDS) submitted on 3/1/02 has been considered by the examiner.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 38 is rejected under 35 U.S.C. 102(b) as being anticipated by Hawthorn et al. (4884281).

Hawthorn discloses (see fig. 2), as in claim 38, an arrangement of at least one lens (180) and one grin lens (168), characterized in that all elements are optically bonded to each other constituting a single optical element (see at least, col. 6, lines 56-68).

Art Unit: 2873

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

7. Claims 37 and 38 are rejected under 35 U.S.C. 102(e) as being anticipated by Karlsen et al. (6529542 B1)

Karlsen discloses (see fig. 11), as in claims 37 and 38, an arrangement of at least one lens (1103) and one grin lens (1105), characterized in that all elements are optically bonded to each other constituting a single optical element (refer to col. 6, lines 5-25; col. 24-43).

***Allowable Subject Matter***

8. Claims 1-22 and 39 are allowed.

9. The following is a statement of reasons for the indication of allowable subject matter:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in

Art Unit: 2873

claim(s) 1-22 and 39, wherein the claimed invention comprises an element for collimating a fast axis of the lens beam emission, and a second element arranged for rotation of the laser beam emission by  $\pm 90^\circ$  characterized in that both said first and second elements are optically bonded to other constituting at least a quasi-monolithic or monolithic single optical element, as claimed.

### *Conclusion*

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tsuda et al. (5076672) is cited for disclosing an optical device having bonded grin lenses.
